TO CORRESPONDENTS.

"*J. B. N.*"—Sheringham's Ventilator appears to be a very useful invention, and we should have mentioned it before now, but are waiting to speak from actual experience. The cost is trifling. The perforated panes of glass are useful in many situations.

"*Filtering Sewage.*"—Several correspondents state, with reference to Prince Albert's plan, that the same idea had been put on paper by themselves.

"*Lenses.*"—Could the positive image (reversed), be produced at once on a wood block, ready for engraving, or must it be copied? At all events, send us one of some important new building.

"J. L. G.," "A Constant Reader," "Another Lady," "B. F.," "W. M.," "P.," "Justice," "A. A.," "T. D.," "L.," "H. W.," "D. J. H." (thanks; we will not trouble him to make drawings of the windows), "A Surveyor" (we cannot recommend what we have not seen), "J. B. W." (shall hear from us), "W. D." (shall appear), "X." (Parian Cement admits of speedy painting), "A Hand-book of English Ecclesiology" (London: J. Masters); "Churches of Scarborough, Filey, and the Neighbourhood," by G. A. Poule, M.A., and J. W. Hugall (J. Masters); "Ecclesiological Notes on the Isle of Man and the Orkneys" (J. Masters); "Church Walks in Middlesex; being an Ecclesiologist's Guide to that County," by J. H. Sperling, B.A. (J. Masters).

NOTICE.—All communications respecting *advertisements* should be addressed to the "Publisher," and not to the "Editor:" all other communications should be addressed to the EDITOR, and *not* to the Publisher.

ADVERTISEMENTS.

In June will be published, in one vol. imperial 4to., cloth, 31s. to subscribers, 42s. to non-subscribers.

TIDDEMAN, St. Ann's Wharf, Earl-street, City, near Blackfriars-bridge, keeps a large assortment of Rain Pipes, Heads, Spouts, &c., half round and O G Gutters, Socket Pipes for Water or Gas, Branch Pipes, Sash Weights, and other Castings: Iron Work for Bakers' Ovens of every description, fitted complete, to be built in or set in parts.—Prices equal to all competitors. Quantities taken to any extent. Goods landed. A powerful crane.

THE GALVANIZED IRON COMPANY, No. 3, Mansion-house-place.
Call the particular attention of Architects, Builders, and others, to their patent process of galvanizing, or coating iron with PURE ZINC, which, from its acting chemically upon electricity, and PERMANENTLY prevents RUST. The process is applicable to all sorts of iron work, whether cast or wrought, in use for building purposes—such as ROOFS, gutters, girders, floors, WATER or GAS PIPES, railings, window sashes and sashes, blinds, skylight frames, chimney cowls, cisterns, screws, nails, locks, keys, chains, wire guards, &c., &c. The company undertake to supply GALVANIZED IRON, or to GALVANIZE every description of iron work, to any quantity required.—Particulars and prices at the offices of the Company, 3, Mansion-house-place. Patent Galvanizing Works, Millwall, Poplar.
S. VINCENT, Secretary.
N.B. This Company's patent process is applied to the roofs of the New Houses of Parliament, the sheds in the dock-yards at Woolwich, Portsmouth, and Devonport, the Waterloo Station belonging to the London and North-Western Railway Company at Liverpool, and numerous other railway stations, &c., &c., with the most perfect success.
